INSTRUCTIONS TO THE CANDIDATE

Answers are not to be written on this page

1. Roll number should be written in figures and words in the allotted space at the right hand corner of the cover page and nowhere else including additional answer book/s and graph paper.

2. Bar code sticker should be written in the box in numbers and darken the appropriate circles of the OMR sheet provided in the right hand corner of the cover page with Black / Blue ball point pen.

3. Fill all particulars such as name of Examination, Group No., Paper No. and subject at the appropriate space at the left hand upper corner.

4. Remove the Bar Code sticker of the particular paper from the Attendance sheet and affix the same on the box provided in the right hand corner of the cover page.

5. Since a machine will read the Roll no., please check and ensure that Roll number written in numbers, words and circles darkened are correct. In case any candidate fills this information wrongly, Institute will not take any responsibility for rectifying the mistake.

6. The answers should be written neatly and legibly

7. The answer to each question must be commenced on a fresh page and question number prominently written at the top of each answer. Alternatively, the question number should be distinctly written in the margin.

8. The answer to each question in all parts should be fully completed in one page, or in a consecutive set of pages, before the next question is taken up.

9. Writing of Roll number in place/s other than the space provided for the purpose or writing distinguishing mark, symbols like "OM", "Sri", "Jesus", "786", etc., will tantamount to adoption of "unfair means"

10. Before submission of answer book to the invigilator after completion of the exam, take care to score out (X) blank pages, if any, that you might have left.

(b) Mobile Computing → mobile computing
 refer computer, hardware,
 without wire. This is a wireless technology
 which include the mobile phone, smart
 phone, tablets.

In the modern era of business the
 work on mobile computing increases continuously.
 Many organisation shift their work on
 the mobile.

Through the mobile computing organisat-
 able to increase its business growth. Now
 customer give order through mobile, sale person
 receive the order on mobile and deliver
 the order at the location of recipient
 through the help of mobile.

In mobile computing use GPRS
 (Global Packet Radio Service) and GSM to
 provide service through it.

The mobile computing have following
 component.

(i) Mobile Hardware → mobile hardware
 is the small size equipment
 which have all facility like memory.

↑ DO NOT WRITE ANYTHING HERE

Storage, Processing unit. Mobile Hardware have capacity to hold data as Computer and its capacity may expand. The mobile device have its own power source i.e. it can easily use anywhere without any extra power.

↑ DO NOT WRITE ANYTHING HERE

(ii) Mobile Software :- Mobile software with the manipulation of Hardware do many computer related task. Through the mobile Software we do all office work on the mobile. The software in the mobile should be based on new technology to proper utilisation of the mobile resources.

↑ DO NOT WRITE ANYTHING HERE

(iii) Mobile Network :- Through the mobile network we access the corporate information from anywhere at any time. The mobile network service provider are the public Network Provider. Hence while accessing data through public network in the mobile there is a risk to lose lost the information. Through the GPRS use the network to access the network through mobile.

4 1/2

(c) The valid consideration for acquisition of both hardware and software.

(i) Vendor selection :- Vendor should be selected on the basis of standard set by organisation. Vendor selection should be made on the basis of Request for proposal. RFP send to selected vendor. The selection of vendor also important which include the Goodwill of vendor, financial viability of vendor and local support of vendor.

(ii) Geographical location of vendor :- The vendor should

have local support which help to organisation in future in case any support requirement from vendor. If vendor are not local then RFP not accepted and no further discussion on it.

(iii) Presentation by selected vendor :- The selected vendor are present their hardware, software their efficiency and technical capacity.

(e) Type of System Testing

(i) Recovery Test :- In this testing, the system is tested that how the recovery are made by system in case of disaster. Whether the system is efficient to make full recovery or not.

(ii) Structural Test :- In this testing the logical processing of the system is testing. For example a system is made for Tax calculation than it is check how the data manipulate and processing made to calculate such test. In this the Actual result are compared with the system result.

(iii) Stress / Volume Test :- This is the testing of system beyond the normal processing. Sometime it is upto its break even. In this testing it is evaluate that how the system handle unusual situation or in more demand are made on software how it react.

(iv) Performance Test :- In this what system do and also check what systems not to do. In this testing the normal processing of system evaluate what time taken by the system and how the exception are handle.
