PART II – Descriptive Questions (70 Marks)

1. (a) According to AS 16 “Borrowing Costs”, borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset should be capitalized as part of the cost of that asset. The amount of borrowing costs eligible for capitalization should be determined in accordance with this Standard. Other borrowing costs should be recognised as an expense in the period in which they are incurred.

The standard also states that to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset should be determined as the actual borrowing costs incurred on that borrowing during the period less any income on the temporary investment of those borrowings.

Thus, eligible borrowing cost on Loan of data bank to be capitalized:

$$= ₹ (60,00,000 \times 8\%) \times 10/12 - ₹ 30,000$$

$$= ₹ (4,80,000) \times 10/12 = ₹ 4,00,000$$

$$= ₹ 4,00,000 - ₹ 30,000$$

$$= ₹ 3,70,000$$

Loan	Particulars	Nature of assets	(a) Interest to be Capitalized (₹)	(b) Interest to be charged to Profit & Loss Account (₹)
Data bank	Construction of factory building	Qualifying Asset	3,70,000	(4,80,000 - 4,00,000) 80,000
Satya Bank	Construction of factory building	Qualifying Asset	(1,92,000 × 14/20) × 10/12 = 1,12,000	(1,92,000 × 14/20) × 2/12 = 22,400
Satya Bank	Working Capital	Not a Qualifying Asset	NIL	(1,92,000 × 6/20) <u>= ₹ 57,600</u>
	Total		<u>₹ 4,82,000</u>	<u>₹ 1,60,000</u>

Note: Loan from Satya bank is considered to be specific borrowings.

- (b) As per AS 11 "The Effects of Changes in Foreign Exchange Rates", **Foreign currency monetary items should be reported using the closing rate. - (b) (i) In this case, accountant of company created a provision for damages of probability of losing a suit by a charge against profits. Unless the probability of losing the suit is more than probability of not losing it, there should not be any creation of provision for such probable losses. So there is no need to charge such loss against profit and disclosing the same in financial statements.
- (ii) Repairs and maintenance are revenue expenditure and should not be added to the value of assets, as these expenses do not increase the capacity of asset. Hence such expenses should be charged to profit & loss statement.
- Further the chief accountant also disclosed its policy of adding repairs to value of assets by way of notes to accounts. As per AS 1 disclosure is not a method to correct the wrong treatments. So the contention of chief accountant is wrong.
- (iii) Accrual is one of the Fundamental accounting assumptions. If fundamental accounting assumptions are followed properly then no specific disclosure is required. Disclosure is required only when there is deviation and the company is not following fundamental accounting assumptions. So the company need not disclose this in financial statements.
- (iv) As per AS 1, any change in the accounting policies which has a material effect in the current period or which is reasonably expected to have a material effect in later periods should be disclosed. Accordingly, the notes on accounts should properly disclose the change and its effect.

Note: So far, the company has been providing 2% of sales for meeting after sales expenses during the warranty period. Now the company has improved the quality of its products with better technology and has been observing that actual expenses are very less than the provision, Hence, the company has decided not to make provision for such expenses but to account for the same as and when expenses are incurred. Due to this change, the profit for the year is increased by ₹ 1 crore than would have been the case if the old policy were to continue.

- (c) As per AS 17 'Segment Reporting', a business segment or geographical segment should be identified as a reportable segment if:

Its revenue from sales to external customers and from other transactions with other segments is 10% or more of the total revenue- external and internal of all segments; or

Its segment assets are 10% or more of the total assets of all segments.

If the total external revenue attributable to reportable segments constitutes less than 75% of total enterprise revenue, additional segments should be identified as reportable segments even if they do not meet the 10% thresholds until at least 75% of total enterprise revenue is included in reportable segments. This is not applicable in the given case. In the given case 75% of External Revenue is ₹ 10,500 Lakhs ($₹ 14,000 \times 75\%$) and the total External Revenue from Reportable segments is ₹ 12,300 Lakhs. So, no need to add Reportable segments.

On the basis of turnover criteria segment Fan is reportable segment as its sales are more than 1,850 lakhs (10% of ₹ 18,500 lakhs). Moreover, total external revenue attributable to reportable segment is also more than 75% of the total enterprise revenue.

On the basis of asset criteria, Fan and Light are reportable segments as their assets are more than 4,450 lakhs (10% of ₹ 44,500 lakhs).
